Claresholm Local News

Mr. and Mrs. Arnold Fraser left for Strathmore yesterday.

Miss Marie Dixon is visiting her aunt Mrs. Mark Fisher for a few days.

Mrs. Tattenger was admitted into the hospital for an operation yesterday.

Madam Magin, of Nee, France, is visiting her uncle R. H. Kingscode.

Mrs. Frank Callahan is being visited this week by her sister Mrs. O. D. Walker of Olds.

Mrs. Booth arrived in Claresholm last night after a two months' stay in Guelph, Ont.

The Wortendyke family has moved into the Clark house, formerly occupied by Mrs. V. Wilson.

L. C. Cramer and Tom Wilton went for a fishing trip over the week end and enjoyed some good sport.

Mrs. Cornelius and Mr. and Mrs. E. Crammy have returned in time to take up their scholastic duties.

Mrs. Kate of Barons and Wilfred Keats of California are the guests of Mrs. R. S. MacDonald this week.

Mr. and Mrs. Alf. McAlister and their two daughters, motored to Calgary on Sunday for a few days' stay.

J. J. Telf, a former resident, took delivery of a Chrysler "52" sedan on Tuesday from the Claresholm Garage.

Charlie Chaplin in "The Gold Rush" in the Rex theatre, Friday and Saturday nights this week and matinee Saturday afternoon.

The Misses Enid Murray and Kitty Guy are visiting in Calgary with Mr. and Mrs. Syverson who are former residents of Claresholm.

The Rev. McNiven, a former pastor of the Methodist church in Claresholm, passed through town on Tuesday on his way from Seattle to Calgary.

Hugh Davidson, Hazel McDonald and Ray and Marjorie Miller were discharged from the hospital this week after treatment for minor ailments.

Mrs. V. Wilson and Miss Josephine Wilson left yesterday for a few weeks' trip to Vegreville, after which they intend to take up residence in Edmonton.

The Church of England Ladies Guild will open on Wednesday, September 7th, at 3 p.m. All members are cordially invited to attend for the opening meeting.

Clear Lake school district is having a concrete basement constructed under the school house to install a furnace. J. H. Bousquet has the contract for the concrete work.

The town school started yesterday and the drug stores report that there was the usual early morning rush for pencils, pens, notebooks and so on, to say nothing of candy for recess.

It is with regret that we report the death of Mrs. Thomsen, a well known resident of Claresholm. For some time she had not enjoyed good health and she passed peacefully away on Saturday last. She is survived by her husband and two sons, Larry and Nels. The funeral was on Tuesday afternoon after a touching service at the Lutheran church.

Mrs. Dickmeier and a party escaped injury in what might have been a very serious accident on Monday. Mrs. Dickmeier, was driving home from Waterton Lakes with Miss Hynes and Dredrick Dickmeier when the car, loaded off the grade and a telephone pole on the ground caused the car to overturn. The occupants fortunately escaped injury but the car was somewhat damaged.

The weather this week has been more favorable for ripening of the grain. Drying winds have helped considerably. Quite a number have started cutting spring wheat. With favorable weather cutting will be general here next week. There has so far been no damage from frost in this district.

Mrs. Johnnie Amundsen entertained some twenty friends yesterday evening. The affair was mostly musical, the hostess herself singing some solos, which were greatly appreciated. Miss Nellie Wallis rendered several well-executed piano solos and also accompanied Miss Delrose Walker whose violin playing was extremely good. A delicious lunch was served at midnight and the party broke up soon after.

SUNDAY SCHOOL PICNIC

St. John's Sunday school held a very successful picnic on Tuesday afternoon, at the home of Mr. and Mrs. Oliver Mosley. The weather was all that could be desired, and everyone, young and old, enjoyed every minute of the afternoon, which was spent in the usual picnic fashion.

There was abundance of good things to eat, lots of ice cream, candy, etc., and the races were most exciting. We believe the most thrilling event was the race between the minister and the organist, at first it looked as if the minister had it all his own way, but as the organist must have had special training for this event, she won easily.

The Rev. Mr. Barlow, superintendent and Sunday school teachers, wish to thank all those who so kindly helped to make the afternoon a success by loaning their cars for transportation, contributing the good things to eat and donating the prizes. They wish specially to thank Mr. and Mrs. Mosley for the use of their grounds, where the trees, and beautiful flowers blooming there, were very much admired.

UNKNOWN MOTORIST IN BAD ACCIDENT

A man whose identity is at present unknown was brought to the Claresholm hospital yesterday in a critical condition and has not yet recovered consciousness. It seems that he was travelling four miles north of Staveland in a touring Chevrolet when he took a corner too fast and overturned.

A passing car picked up the injured man and his wife who was suffering only from minor injuries, and on instructions from Dr. Stewart they were brought to the Claresholm hospital. Owing to the inability of the wife of the injured man to speak English very few details can be discovered until the patient recovers consciousness, but it is believed that the couple came from the Crow's Nest district.

Claresholm Car Damaged in Collision at Macleod

Macleod, Aug. 29.—What might have been a serious accident occurred Saturday afternoon, when two cars, a Pontiac sedan and Ford coupe, met in collision at the Ford car being practically wrecked, while the other car was also badly damaged. W. Currie, owner of the Ford, was proceeding up Third avenue on his way to lunch, when a Pontiac car from Claresholm, containing three passengers, including a very old lady, came around the intersection of Twenty-first street and Third avenue, and the Ford coupe slammed into them broadside, damaging the doors and frame of the Pontiac, at the same time wrecking the front of the Ford beyond recognition. Outside of a few bruises, the occupants escaped without injury.

Good Bread on the table at threshing time is essential to obtain the maximum amount of labor from your crew.

Use Claresholm Bakery's Quality Bread

As is our custom, special price for supplying threshing crews.

The Wawanesa Mutual Insurance Company's policy has always been, since its organization thirty years ago, to give to its patrons fire protection, at the lowest possible cost, consistent with safety.

And we are pleased to announce that from now on the cash rate on farm buildings will be reduced 25c per \$100.00 for three years. This makes our cash rate \$1.25, or \$1.00 per \$100.00 if your house has lightning rods and basement chimney.

Our assessment note plan requires no money down. And this year the rate is fixed at 20c or 40c per \$100.00 for one year.

Farm Sales a Specialty

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost, nor is the money spent on better interior lighting.

Anything that increases the labor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment. Just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Issued by Canadian Weekly Newspapers Association

Western Canada To Be Important Section Of One Of World's Greatest Countries

Western Canada, "An Area of Dimensions," is destined to be in the years to come one of the greatest parts of one of the greatest countries in the world, according to Roger W. Hubbard, prominent statistician and authority on business affairs, who addressed the Board of Trade at Calgary recently.

Mr. Hubbard dealt with the location, the climate and the resources of the country and to the characteristics of the people who comprise its population. He spoke of the emigration of the Canadian youth to the United States, and deprecated the fact that much about Canada is not taught in the universities in order that citizens might be shown that to go to the United States is not to live on milk and honey for a few years but to be thrown on the scrapheap later, when they stay in Canada, they might start from the bottom of the ladder, but surely build better financial independence for themselves.

Dealing in detail with this country, which has been taking place from Canada to the United States, the speaker declared that, during his travels in Canada he had made a point of inquiring from the young people whom he has met, to find out their primary reason for coming to Canada. He has found here many young people from the British Isles and Australia who are anxious in Canada only to make their money in the United States and to be thrown out.

In your universities and colleges, you are teaching your students much about history and the sciences and law, but are you teaching them enough about Canada? He asked. "Are you teaching them anything about Canada's abundance of resources? Are you telling them the truth about the economic of Canada?"

Much can be done to really assist these young people. They are entitled to the true economic condition of the United States. At present that country, he continued, is being worked in a great way of prosperity, but the wave cannot always hit the stock markets cannot always continue to rise. They must expect a time when the tide will swing the other way and when the depression, the Canadian, the English, the Scotch and the Australian will be the first to be cast out of employment. Much can be done to prevent this disaster for them by a proper method of education, he continued.

Canada, he declared, has the power climate because a temperate climate is necessary for the building of sturdy, sturdy manhood. Such a climate has always been the cause of the raising of the races of men, who have contributed the most to the world's progress, and it is a rare example in the development of the United States to show that the more healthy of the men who really contributed most to the world's progress, the nation's greatness came from the northern climates.

Shipping Horses To Russia

Western Horses Bound For Russia Leave Alberta

The first of the 1000 Canadian horses ordered by the Russian government has been shipped. It is announced by A. M. McCallum of the Canadian Department of Agriculture. Arrangements were made for a train load of 26 cars, carrying 200 horses, to leave Calgary and Medicine Hat. Although some difficulty has been caused in procuring the horses, the horses required because of the price offered, Mr. McCallum said the first train load would leave Quebec only a few hours short of the 1500 originally arranged for.

Advice Served Good
Certain actor, playing the part of a convict here, practiced a realistic scene. During the first performance he continued to play the part with the same vigor, in the play, had to remark, "My dear friend, what can I do for you?" "Whereas a convict, friend, from the gallery exclaimed, "If you are his friend, why don't you give him a beating?"

Good Prospects For Sheep
Prospects for the sheep industry are most hopeful this year. Good prices in sight for both lambs and wool, according to W. H. J. Tisdale, assistant manager of the Canadian Co-operative Wool Growers' Association, who has just completed a tour of the wool growing districts of Western Canada.

W. N. C. 1023

Have Become a Menace

Rabbits Undermining Lighthouse At Entrance Of Juan De Fuca Strait
The rabbit, such a pretty and attractive pet when kept in a hutch, is undoubtedly one of the most destructive and dangerous pests among the mammals.

In Australia, millions of dollars worth of damage is done by it every year, and hundreds of thousands of dollars have to be spent in eradicating the pest, laying traps, and so on.

A similar state of things exists in California, and now the rabbit is devastating South Island at the eastern entrance of the Strait of Juan de Fuca.

Here the animals are proving more destructive than the sea and they have so undermined the lighthouse standing there that it is in danger of falling.

Twenty-five years ago a former lighthouse keeper took a pair of rabbits to the island and began breeding them to supply the Seattle market, little realizing what the result of his experiment would be.

The rabbits multiplied at an alarming rate and overran the island, eating every green thing and tunnelling through the sandy soil. Not only the lighthouse but the whole station is now in danger, but the very land itself is threatened, for, undermined as it is, in all directions, and covering only 25 acres, it will fall in easy prey to angry seas.

It is astonishing what a darker and more sinister a little animal, which, individually, is not only inoffensive but attractive.

Winnipeg Newspaper Union

Johnston
The Winnipeg Newspaper Union has elected John Johnston as its president.

The union has a membership of 100 and is organized to protect the interests of newspaper workers in the city.

The union has a strong record of success in its negotiations with employers and is committed to the principles of fair labor practices.

England Enjoys Empire Fruits

Depends On Export From Dominions For Luxury Goods

In our use of fruit today, says the Secretary of the Dominion has just put it, we are still dependent on the United States, as the Continent is far behind us. The Americans had the first of the fruit of their position. The United States, possessing not one climate, but many, produces with its own frontiers an abundance of all the fruits of the temperate and sub-tropical zones, and "The Tropics" are at its doors. Our small islands, which we may boast that the fruits which we grow on our earth grows better, cannot provide for twelve months in the year. It is only in the Dominion that we develop their natural resources and send us the crops of the orchards under the warm sun. Those who have had peaches and plums in winter and apples all the year round—London Daily Telegraph.

Injustice To Agriculture

Food Shortage Is Predicted In United States Within Next Year

A revolt by the industrial population against high food costs was predicted by the Dominion.

Henry A. Wallace, one of the former secretaries of the association, in an address on the agricultural situation, declared the grave injustice that has been done to a country which has produced within 40 years with results and disturbances that will cause industrial countries a thousand times as much worry as the present farm situation.

He warned that the industrial population might precipitate trouble when an industrially inadequate food supply compels them to pay more for their wages for food.

Offer High Price For Poultry

University Of British Columbia Refuses \$10,000 For Men

An offer of \$10,000 for the famous hen, a hen of a pair of top birds of last year's Experimental Farm contest at Agassiz, of which Hen No. 6 was one, has been made to Professor Elphinstone of the University of British Columbia, who is in charge of the British Columbia exhibit at the World's Poultry Congress.

When Elphinstone, head of the College of Agriculture in the B.C. University, to whom the offer was referred, announced recently that it had been declined as the birds were of too great value to the University for breeding purposes to dispose of them. The offer is said to be the highest ever made for a poultry bird.

British Children Travelling

More applications are now being received at the British consular office for names of children to be included in passport applications than ever before. The consular office is taking urgent steps to deal with the demand for children's passports, as the number of children travelling abroad has increased so much that extra provision has had to be made on many ships for young passengers.

Found More Money In Hay

A ton of hay bought for \$25 on the track at Hudson, Ont., goes \$125 at Red Lake. A far-sighted proprietor stated about ten acres of comparatively clear land at Stoke Falls. The following summer he cut and stacked twelve tons of wild hay which he sold to a transportation company for \$125 per ton in the stack; he also sold the hay and stored in a barn of a settler and a bar.

Weight Of Rainfall

One Inch Of Rainfall Deposits 113 Tons Of Water On Each Acre

It is not generally recognized that rain with great weight. Even when the clouds let loose a torrential down the wind reveals it in ounces rather than tons, yet one inch of fall deposits 113 tons of water on each acre of ground surface. To take an extreme case, so far as rainfall goes, that of Cherrapunji, in India, on the watershed of the Garo, nearly 2000 tons have fallen in but one month. August. The average annual rainfall of 425 inches would amount to nearly 20,000 tons to the acre.

Car Salesman: "And what kind of a horn would you like, sir? Do you care for a good, loud blast?"

Haggard Customer: "No, I want something that just sneezes."

Poultry Business Profitable

Canada Not Yet Aware Of Importance Of Industry

An honor was paid to Canada by selecting Ottawa as the scene of the World's Poultry Congress. This is only the third congress that has been held, so that the place of the Dominion in poultry matters has early received international recognition.

Canadians are so much accustomed to hear about the value of the wheat produced in the West, the value of our lumber and minerals, and the value of our manufactures, that the importance of the poultry industry is not yet fully appreciated.

There are few great poultry farms, but it is the few here and the vast number of small flocks that make up the poultry business in Canada. Fifty million dollars is the value of the annual production of eggs alone in this country. Many millions more must be counted for poultry products for table use.

Canadians stand foremost in quality. They command the highest prices for eggs imported by the British.

That position is only achieved by sound breeding. The result carries its own weight for the farmers of this country.

If quality of eggs commands the highest price in the export trade, the same principle applies to hatching, butter, cheese and every other product. In these lines Canada is either producing better or almost standing still.

There are too many farmers who are content to jog along, doing a little better than just making ends meet. They need stirring up to a realization of their opportunities.

It is time to clean up the poultry business, so that every article that is brought by export buyers will measure up to one standard—the best—and exporters will have confidence that if it is Canadian it is good.

Use Tar Sands On The Road

Ninety Carloads Of Tar Sands From McMurtry To Be Used At Jasper

Ninety carloads of tar sands will be shipped from McMurtry during the present summer, to be used in road-making at Jasper Park. The work of surfacing the roads is being supervised by Dr. S. C. Ellis, of Ottawa, who has spent several years investigating the tar sand deposits and experimenting with the material with a view of developing some practical means of utilizing the material. A pile of road paving some twenty years ago under the supervision of Dr. Ellis, is almost as good as new today as it was when first laid down, in spite of heavy traffic.

Weight Of Rainfall

One Inch Of Rainfall Deposits 113 Tons Of Water On Each Acre

It is not generally recognized that rain with great weight. Even when the clouds let loose a torrential down the wind reveals it in ounces rather than tons, yet one inch of fall deposits 113 tons of water on each acre of ground surface. To take an extreme case, so far as rainfall goes, that of Cherrapunji, in India, on the watershed of the Garo, nearly 2000 tons have fallen in but one month. August. The average annual rainfall of 425 inches would amount to nearly 20,000 tons to the acre.

Car Salesman: "And what kind of a horn would you like, sir? Do you care for a good, loud blast?"

Haggard Customer: "No, I want something that just sneezes."

Migratory Birds Treaty Between Canada and U. S. Has Been Very Beneficial

Horses Deserves Best Of Care

Is Still Indispensable and Renders Good Service

The horse is a faithful, patient friend of man. He deserves the utmost care and attention. He still plays an important part in the economic life of the nation, and is still indispensable. In short, the horse is a cheaper power than the auto. Apart from treating the horse well for his fulfillment, it pays to use him well from the standpoint of service. A well-fed, well-cared-for horse will do his portion to render better service than the horse which is neglected and ill-fed.

Now that the weather is in evidence, these things and having the care of horses should give them extra attention. Of course they should be well supplied with food and water, and they need a large quantity in the course of a day.

There are two reasons from which the working horse may suffer great annoyance and pain—one is the collar, the other the bit. Almost every horse has some trouble with the collar, and the bit is almost sure to be on the top of his list, when the collar has pulled him, often he is compelled to wear a heavy lead. A properly fitted collar, well adjusted and padded, will cause no trouble.

Be good to your horses. He will be grateful to you and will render you increased service.

Retain Women Employees

No General Removal Of Policy On The Part Of The C.N.R.

The Canadian National is not as a general principle, substituting men for women in the various clerical positions throughout its system," stated W. A. Kingland, general manager of western region, Canadian National Railway.

Press reports that women were to be let out of clerical positions all over the system and men substituted caused consternation in the ranks of women waiters for the railway, which claim is now clarified by Mr. Kingland's statement.

What is being done, Mr. Kingland stated, was that in certain clerical positions where, due to conditions, it was considered that men were better fitted for the work than women, men were being substituted, but there is no general reversal to the policy which existed before the war, when men were employed through the service, and few, if any, women.

Trying Color Cures

By replacing white walls and red coverlets in hospitals with delicate green, yellow, and mauve ones, it is claimed that patients are kept in a better humor, sleep well, and leave hospital three days sooner than under the old conditions. One hospital is now experimenting with colored walls, and is said to be very successful. The result is said to be a more cheerful atmosphere of a room decorated in mauve.

Seek Cooler Motor Car

Experiments at the Air Research Laboratory of the American Society of Heating and Ventilating Engineers in the Pittsburgh branch of motor cars had to many developments in automobile design, according to E. C. Houghton, director. Among the possibilities are mentioned white roofs and strips of damp burlap or some other device to lower temperature in hot weather.

Another Royal Ranch

Land On Vancouver Island May Be Presented To Prince George

Prince George may be the recipient of a ranch at Cobble Hill, Vancouver Island, B.C., when he and the Prince of Wales visit here this summer. The proposed presentation has been suggested by the Associated Boards of Trade of Vancouver Island, and the presentation will be made to the Prince for the purpose, the City of Victoria \$10,000 and other municipalities on the island \$10,000. The remaining \$40,000 of the \$60,000 would be raised by public subscription.

Although the ranch, including an extensive building, has been purchased for \$40,000, it is stated that \$25,000 has been expended on it. The project will be before the Governor soon, almost immediately.

Threatening A New Double Strike

During a large telephone call last week, completed after a number of work, astronomers propose a two-year search about the sides from the present, on account of the purpose of maintaining the known data and to look for new ones. The best for the instrument was found and on first wide and on second narrow, it was found that it will be mounted under an electrically operated fifty-foot dome, costing approximately \$10,000.

RUNNING AHEAD OF THE TIMES

To keep ahead of the times is not, but to run ahead of them is better, and that is what the Canadian National Railways are doing in putting on the rails this powerful electric car, the latest invention in railroad transportation equipment. Two of these cars has just come west from Montreal for service on the line between Saskatoon and Edmonton.

They are fashioned after the oil-burner car which made the famous run from Montreal to Vancouver in twenty-six hours in the fall of 1925, but they contain many improvements and additions and are equipped with oil-burner engines. Although many railways in the United States have endeavored to evolve a car which would be economical to operate as

well as able to satisfy the demands of traffic, the Canadian National Railways have been the only system, up to the present, successful in producing a self-propelled unit capable of fulfilling all the requirements. The new cars are 75 feet 9 inches in length and on four wide and on second narrow, it was found that it will be mounted under an electrically operated fifty-foot dome, costing approximately \$10,000.

223. Amount of Lumber Rejoined Products?
224. Extent of Moving Picture Industry?

Correct answers given next week. See how many you can answer by that time.

ANSWERS TO LAST WEEK'S QUESTIONS

211. Why There Are More Black Clothes Than Other Colors?

As black is a staple color and always more or less in vogue, goods put into this color are always marketable. There are two main reasons for dyeing cloth to make it more ornamental and less obviously soiled. The latter explains largely why black is the commonest color applied to woollen goods. There are other good reasons when things go wrong with other shades in the dye house, they can always salvage them by turning them into black; also every season has its fashion colors, particular to the season; the left-overs can be turned into the staple staple black and gradually worked off.

212. The Largest Telescope in the World?

It is the 100-inch reflector at the Mt. Wilson Observatory in California. The second largest, a 72-inch reflector, is that of the Dominion Astrophysical Observatory, Victoria, B. C., Canada. The 100-inch concave mirror at the bottom of the telescope throws the rays of light back towards the upper part of the tube, where they are diverted and fall on the photographic plate or on an eye piece through which the observer looks. The Mt. Wilson telescope gathers 40,000 times as much light as the naked eye. There are 5,000 stars visible to the naked eye; this immense instrument brings 320 million into view.

213. The Farthest North Star-keeper on the Western Hemisphere?

To reach Charles D. Brower's store requires a journey of weeks, even months, over northward trails. The Alaskan mainland, across icy Bering Sea, into the arctic tundra through Herby Strait, on into the Arctic and up to the coast of Pt. Barrow, the northernmost town of the American continent. His principal customers are about 600 scattered Eskimos; he buys their furs and sells a little of everything—traps, traps, ammunition, tobacco, and cigarettes; for the women, kitchen necessities, candy (mostly assorted gum drops), perfumes, chewing gum and (you) silk stockings, which they pull up over their fur trousers.

214. The Myriad Uses of Denatured Alcohol?

Water is the only solvent used industrially in greater quantity than alcohol. About 75 million gallons of denatured or partly denatured alcohol are used annually in the U. S. The motor industry requires some 35 million gallons to prevent freezing of radiators; perfumes, toilet preparations, for stoves, laundries' supplies, etc., require about 10 million; cellulose industry requires 6 million; shoeing creams, jellies and cigarettes and the jelling of fruit juices can

sume 2 million; some 35 million gallons of specially denatured alcohol is the raw material of 1,000 chemical and other industries.

215. What Part of Our Food Comes From the Tropics?

Many tropical products of daily consumption have become so indispensable with us we rarely think of them as imports. Much that we eat and many things used otherwise come from the tropics. As time goes on ever increasing quantities will come from there, where nature is generous in production. We annually consume immense quantities of sugar, coffee, cocoa and chocolate, tea, bananas, pineapples, spices (cinnamon, pepper, cloves, vanilla, etc.), rubber, fibers, tropical woods and coconut products (coconut butter, grated coconut, copra, soap, door-mats, brushes, fans, etc.).

216. The Meaning of the Different Whistles of the Locomotive?

It adds interest to the journey when one understands the "language" of the iron horse. (Explanation: a whistle is short, long, long one) means stop, put on brakes; — means get ready to start; o-o-o flagman go out to protect rear train; — flagman return from west or south; — flagman return from east or north; — when running train breaks in two; o-o-o all right in answer to other signals; o-o-o (when standing), back up; — o-o-o, calls attention of other trains; signal; o-o-o, acknowledgement by other trains; — o-o-o, approaching grade crossing; — approaching station; o-o-o-o-o-o-o-o, etc. Live stock persons on truck.

217. A Good Remedy for Ivy Poisoning?

Potash lye and sulphur acetate are oils which are poisonous to the skin. It is a fixed oil, but it is not dry up, but keeps on burning and blistering. The skin becomes red, swollen, painful and itching; blisters form and scratching breaks them open and makes matters worse. Remedy is anything to dissolve and remove the oil without injuring the skin.

Through washing with soap, especially green soap, is good; heaping talcum powder baking powder in pint cold water will relieve itching. Cure is to wash affected parts number of times in solution of alcohol and sugar of lead 20 to 1.

GRANUM MAN HURT IN GAS EXPLOSION

Granum, Aug. 31.—Jack Healey, manager of the National Excavator Company here, had a serious explosion from gas during this morning when a gas explosion in the engine room blew loose the north and east sides of the building.

Healey had slept in the office, and on arising heard the gas escaping through the meter. He shut off the gas and went to breakfast. On his return he entered the building and, just getting inside, was met with a tremendous blast of gas and flames having ignited in some manner.

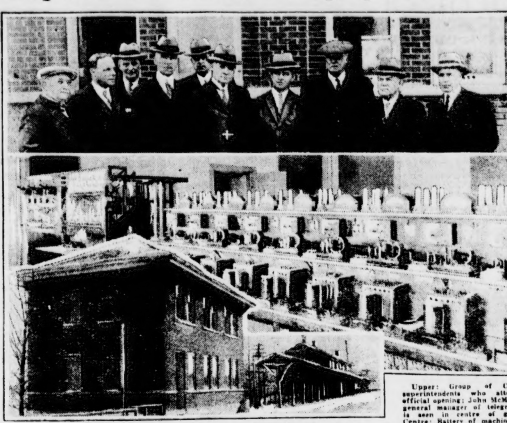

The force of the explosion tore the whole north and east sides free at the bottom. He immediately started in the office and Healey, although badly burned, crawled out a window, then, opening the door of the office, managed to throw out papers, that were burning, and finally stamped out the fire. He was then dressed by Dr. Bradford, who treated his burns and had him put to bed. He is being taken to Macleod, where he will be placed in the hospital.

MARRIAGE

Porter—Greenway

Lathbridge Herald: A quiet wedding was solemnized on Saturday afternoon, in the presence of relatives and a few intimate friends, at the home of Mr. and Mrs. R. W. Greenway, 803 10th Ave. S., when their daughter, Margaret Mae, became the bride of Joseph A. Porter, son of Mr. and Mrs. V. A. Porter of Edmonton. The Rev. T. T. Fairclough officiating. Mr. and Mrs. Porter will reside in Lathbridge, at the Aberdeen Apartments.

Important Link of Telegraph Service

The last link in the Canadian Pacific Telegraph system across the continent, to conform with the most advanced developments of telegraphic science, was completed recently, when a new telegraph repeater station was formally opened at White River, Ontario. The main switch, cutting the new up-to-date station into the circuit, was closed by Mrs. J. E. Dewar, who had been specially connected with Canadian Pacific developments at White River since construction days. Many prominent officials of the Company were present at the official opening, January 29, including J. McMillan, general manager of Telegraphs, Montreal; J. H. Humphrey, general superintendent, North Bay, and D. H. Brown, superintendent of Telegraphs, Sudbury.

Through the installation of the new plant, the efficiency of overland facilities will be greatly increased owing to the fact that signals formerly carried direct from Sudbury to Port William, will now be strengthened and repeated at White River, the half-way point. It was pointed out to the press by Mr. McMillan that the overland service will be increased in speed and flexibility, thus affording additional service. The present approximate distance between stations of this nature operated by the Canadian Pacific is 300 miles. A few years ago distance between repeating stations were fully double the distance now accepted as the best practice. For example, Mr. McMillan pointed out, the Canadian Pacific overland wires were stretched from Montreal to Vancouver with the first repeater station at Port William, a distance from Montreal of about 1,000 miles. Since the opening of the service the first station of this nature was built at Sudbury. The decision to further cut down the distance to Port William resulted in the construction of

the new station here. Through the introduction of automatic printers and the possibilities of all greater advances in the science of telegraphy, it was found necessary to establish the new station. Starting from Sudbury, the Canadian Pacific now have repeater stations at White River, Port William, Winnipeg, Moose Jaw, Calgary, Revelstoke and Vancouver, on the overland trunk line. In telegraph service across the continent the Canadian Pacific have installed all-copper wires, and the best equipment obtainable is provided in all their repeater stations from East to West, making the service fast and reliable.

The station here comes under the superintendency of D. H. Brown, the chief in charge of the station will be C. W. McMillan, with repeater chiefs G. B. Brown, and S. Fane.

Superintendent of C.P.R. repeater station, who attended the opening. J. H. Humphrey, general manager of telegraphs, at same station. Battery of machine in new telegraph station. Lower: Repeater station at White River.

CLASSIFIED ADS

FOR SALE

Two sets heavy harness. Apply at Alex Hutchinson's blacksmith shop.

FOR SALE

One used Massey Harris push binder, good condition, price right. Also one used 8-ft. Massey Harris binder; first class condition. See Stewart & Welker.

FOR SALE

Yorkshire pigs, farrowed Aug. 6th. Also one choice Yorkshire boar 15 months old.—W. O. Hart, boar 15 months old. Apply, W. O. Hart, Phone 8006, Clareholm.

FOR SALE

A 32 inch Rumely separator, a 25 horse steam case engine, in good shape. Price \$15,000 for both.—L. C. Chugg, Phone 1020, Granum, Alta.

ROOM AND BOARD

Room and board for two teachers or two high school girls.—Mrs. Day, Clareholm.

FOUND

One tire, tube, and frame, between Parkland and Nanton. Owner may have by phoning 113 Clareholm and paying for this advertisement.

CHURCHES

UNITED CHURCH

Dear Friends:—H. A. Wallace, son of a former Secretary of Agriculture for the United States, has been addressing Farmers' Institutes with this message: "The real need of the corn belt is a great teacher of spiritual value."

Is not this the need everywhere, everywhere—yes and no. Sunday worship is the great opportunity of fellowship and inspiration such as you and your home ever stand in need.

In gratitude, go to the church of your choice. More than you are desiring ripest grain, God is seeking a chance to enrich and enlighten your life.

"With all thy getting, get wisdom"—and so shall thou have good success in all thy ways."

Cordially yours,

Rev. R. W. Dalgleish.

Sunday services will be at 11 and 7:30, with Sunday school at 12:15.

ST. JOHN'S CHURCH OF ENGLAND

On Sunday, September 4, services will be held as follows:

8 a.m.—Holy communion.

11 a.m.—Holy communion with sermon.

Subject—"The Power of Prayer."

Preacher, Rev. W. Barlow, L.Th.

All are welcome. Refreshment.

12:15—Sunday school and Bible class.

We ask all parents to send their children to Sunday school, which will be held in the Parish Hall.

THE CHURCH OF THE NAZAREN

Next door west of the Clareholm Garage.

Full salvation preaching.

Sunday Services

10:30—Sunday School

11:30—"Oh! Christian Like a Green Olive Tree"

7:30—"What Shall It Profit a Man?"

Week Night Services

Tuesday, 8 p.m.—Prayer meeting.

Friday, 8 p.m.—Bible study.

Remember—"A glad hand welcome you to worship with us."

Rev. A. H. Eggleston, P.A., Minister.

Another PRICE Suggestion
Maple Nut Cake and Chocolate Layer

THIS unusual, economical Maple Nut Cake will keep fresh for several days, and the Chocolate Layer Cake, made in a little different way with Dr. Price's Cream Baking Powder, is a family favorite too. Try one or both of them today!

(All measurements for all materials are level.)

MAPLE NUT CAKE

- 1 cup shortening
- 1 cup light brown sugar
- 2 eggs
- 1 cup milk
- 1 cup flour
- 1 teaspoon salt
- 1 teaspoon Dr. Price's Baking Powder
- 1 cup chopped nuts—preferably pecans
- 1 teaspoon vanilla extract

Cream shortening, add sugar slowly and yolks of eggs and milk and beat well, add flour, salt and baking powder together and add chopped nuts. Fold in beaten whites of eggs, add flavoring. Bake in well greased but pan in moderate oven 35 to 45 minutes. Cooler top with maple icing and sprinkle with chopped nuts while still soft.

MAPLE ICING

- 1/2 teaspoon butter
- 1 tablespoon maple

Send for FREE Cook Book—"Table and Kitchen"—149 Notre Dame East, Winnipeg, Can.

DR. PRICE'S
CREAM
Baking Powder

Made from Cream of Tartar, derived from grapes. Raises the dough perfectly, giving the food fine texture and rich flavor.

McLAUGHLIN-BUICK for 1928

Cushions that fit you like your Easy Chair

A NEW feeling of luxury—of relaxation—of restful, satisfying comfort—comes over you when you sink into the seat of a McLaughlin-Buick for 1928. For these seats are like easy chairs—made so by tailoring them to fit you, just as fine furniture is tailored.

In every way McLaughlin-Buick for 1928 gives the greatest measure of riding comfort. Hydraulic shock absorbers, front and rear—made an integral part of the car by redesigning McLaughlin-Buick's springs and chassis—smooth out the roughest roads and prevent rebound, adding still further to the joy of McLaughlin-Buick travel.

This is another indication of McLaughlin-Buick's greater value—another reason why you should buy a McLaughlin-Buick for 1928.

ALBERTA CROP REPORT

(Issued by the Department of Agriculture, Government of Alberta.)

Edmonton, August 27.—The whole province gives promise of an excellent crop with high average yields of all kinds of grain. Late seeding, with abundant moisture in the early part of the season, is responsible for the somewhat late ripening of the somewhat late ripening of the wheat crop. The warm sunshine we have had this last week is ripening the crops with great rapidity. The earlier varieties of wheat, particularly that sown on lighter land, are now mature and a considerable amount of cutting of this grain has already been done. Cutting will not be general, however, until the first week of September.

A careful checkup of the frost situation shows that there has been no frost damage except in the extreme northeastern section of the province. In some isolated districts in this area frost struck rather heavily. Except in the above area the province is entirely free from frost damage. Hail damage has been more prevalent than usual, with the result that damage from this source will be slightly greater than average. Rust has made its appearance in a few sections. The damage from this source, however, is negligible.

Notwithstanding the losses caused by the above mentioned factors, if no further serious losses occur, we are convinced that the province will have the largest total yield of wheat in its history. A particularly significant feature this year is to be found in the fact that there is a uniformly good crop in every section of the province.

Large numbers of harvesters are now arriving, and it is not anticipated that any shortage of help will occur.

BARONS MAN SUICIDES

Barons, Alta., Aug. 29.—Robert Salmon, 25, a bachelor, living on the C. Ritter farm near here, committed suicide by shooting himself with a .25-calibre rifle through the head after he had set fire to the farm house, shortly after 7 o'clock Sunday morning.

Mr. Koschinsky, a neighbor, discovered the farm house in flames but was unable to do anything to extinguish the fire. It was not until later, when the house was a heap of ashes, that Mr. Koschinsky discovered the bones of Salmon in the ruins.

Constable Kidley, of the A.P.P., at Barons, was called and took investigation a rifle was found near the remains along with a spent cartridge. A bullet hole was discovered through the top of the skull, and it is presumed that young Salmon after setting fire to the house shot himself through the mouth the bullet making a hole through his skull.

Sergeant Hudson, A.P.P., and Dr. Tipper, of Clareholm, were called in and after a close examination it was decided that an autopsy was not necessary as the tragedy, in their opinion, was a clear case of suicide.

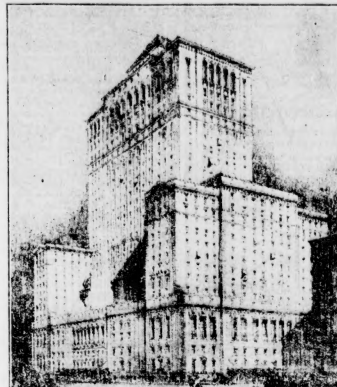

Young Salmon came out from Eastholm, Russia, about two years ago and rented the C. Ritter farm. He had been in good health and his crop prospects were exceptionally good. The motive for the deed is not known.

Salmon was a nephew of Robert Erdman, Barons farmer, who about a month ago committed suicide by shooting.

J. J. Strang requests us to say that the report handed in and published in last week's issue re "Sheep Pool" membership was absolutely wrong in every particular.

The Alberta Wheat Pool is now under royal patronage, the announcement being made in the current issue of the "E.P.A.", the official organ of the United Farmers of Alberta, published on Wednesday, that Prof. W. L. Carlyle, the manager of the "E.P." ranch, in behalf of H.R.B., the Prince of Wales, had signed a pool contract covering 1000 acres.

"The Royal York"—Empire's Largest Hotel

Architect's drawing of the new hotel.

The first architect's drawings released by the Canadian Pacific Railway Company in connection with the construction of the proposed new hotel at Toronto, reveal a structure which, through a series of varying roof levels, will rise to a height of 78 stories above the street level. Containing over 1000 rooms, it will be the largest and finest hotel building in the British Empire, taking its place in the front rank with the world's best.

"The Royal York", as the new hotel will be known, is a name chosen

for it by President E. W. Beatty, believing it to be most fitting in that it associates the new structure with the history of Toronto and conforms with the dignity and importance of the building and the intended appointments. The earliest history of Toronto is encountered in the word "York". About the year 1300, the new province of Upper Canada was duly constituted, and its capital was placed in its center as "a very English town" for that only British John Givens Simcoe, its first lieutenant, upon the name of York, establishing

there as close a copy of British political institutions as he could contrive.

The location of the new hotel is notable in that it is directly across from the new Toronto Union Station, one of the largest railway terminals in America, and which will be opened shortly. The building will extend the feet along the north side of Front street, which is unusually wide at this point and which will result in the hotel being set off to splendid advantage. It will extend on the west to York street and to Flower street on the north. On the east is an open space. A wide artery and walkway will extend under Front street into the new Union Station.

Some idea of the facilities of this new hotel can be gained by the fact that on the two floors above the lobby and first mezzanine, it will be possible to accommodate conventions of six and seven thousand people. One of these floors will be one of the most notable in America. Around a central foyer will be arranged a ballroom, convention hall and banquet room. These halls will be of unusual height and size, being overlooked by balconies opening out on another mezzanine floor.

The roof garden at the top of the tower will be far in advance of anything that has yet been completed in Canada along that line. On three sides it will be glass covered, thus affording an uninterrupted view across the lake and the city. Here there will be several. Above it will be another mezzanine floor containing additional facilities for serving and entertainment.

Detail plans for finishing and decoration have not yet been completed, but considerable preliminary attention to such is being given by Mr. Beatty and the company's directors. The result will be a building that, besides being an ornament to the city of Toronto in every respect worthy of that city's importance and assured growth, will be the largest hotel structure in the Empire. In construction and finishing the new hotel will, as far as possible, be all-Canadian.

5000 FACTS ABOUT CANADA

Canada's jubilee year, celebrating the sixty years of Confederation, is fittingly emphasized in the 1927 issue of "5000 Facts about Canada," the famous tabloid encyclopedia of the Dominion compiled by Frank Veigh, the well known Canadian publicist and author. It is a tonic to read of our remarkable national progress, as tersely set forth in this unique booklet, under city chapters, from "Agriculture" to "Yukon." The contents are more varied than ever, and will provide a revelation to the reader. No better way of making known our resources, wealth and prospects exists than this publication, and it should have a wide circulation this year. The Government could well afford to use it widely in this and other countries. Copies may be had from leading bookstores, or by sending 35 cents to Canadian Facts Publishing Company, 588 Huron Street, Toronto 2, Canada.
